

Bonjour. Here is the key mapping for the EN font.

You must first install the font for QWERTY keyboards (EN font) to see the symbols.

	Q		A
	W		S
	E		D
	R		F
	T		G
	Y		H
	U		\$
	I		O

With that, you have what you need to make scenario for FFG's Star Wars RPG.

There are images for colored dices because you can't add colors to a font. You can use them on every background, the PNG make renders possible.

If you also install the font for AZERTY keyboards, the font for QWERTY is the first one.
